Green Hall 2 – a business centre, which is based on the green productivity philosophy, is growing in the bend of Neris river which surrounds the centre of Vilnius. Here, modern technologies and nature go hand in hand in order to create a particularly favourable environment for productive work and unrestricted creativity. From the very beginning, the business centre was designed by considering the well-being and productivity of people that will be working in it, as well as the innovative business needs, while at the same time maintaining respect for nature and its provided advantages. This purposeful concept is also reflected in each element of the building.
