Vladimír Raš**

The communication with NEWSEC was always clear and very effective. You gave us very accurate information, we have received from you only concrete points with concrete solutions. You were able to keep all deadlines and delivered all your promises.

In case of any problems you have informed us immediately or in advance and you didn't try to hide it in front of us, which helped us to react fast and find the best solution for the project. You took the effort to understand our point of view in details.

Thank you for your professional and transparent cooperation and your straight forwardness. I have to highlight that during the rebuilding your premises the mall was very clean all the time.

NEWSEC promotes high level of teamwork, managed to build trust and respect in such a short time. You have created very good team of contractors like architects or GC around yourself. It shows that you very good manager, team players and team leaders. It is visible you know the building market very well. It was a pleasure to work with you and I would work with you any time in the future.
